

WORKSET PROMPT

ACTIVATING WORKSET PROMPT

- 1 After installing GeminiBIM tools, navigate to the newly added GeminiBIM tab.
- 2 Locate the Workset Prompt tool located on the left side of the ribbon.

- 3 By default, the icon is displayed in the red off status. Select the icon to enable.
- 4 When enabled, the Workset Prompt will be displayed as the green on status.

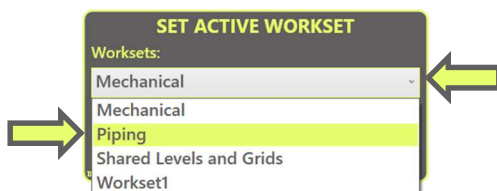

USING WORKSET PROMPT

- 1 After activating the workset prompt, you will receive the Set Active Workset dialog box when opening a workshared model.

- 2 Select desired workset from the drop-down list.

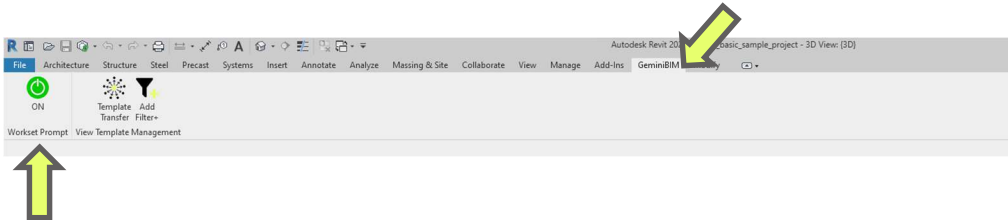

- 3 Select to gray inactive worksets if desired.

- 4 The model will be opened with the specified workset as the active workset, and if the optional gray inactive workset was selected, all other workset will be grayed.

DEACTIVATING WORKSET PROMPT

- 1 Navigate to the GeminiBIM tab.
- 2 Locate the Workset Prompt tool located on the left side of the ribbon.

- 3 Select the Workset Prompt icon to disable.
- 4 When disabled, the Workset Prompt will change from the green on status to the red off status.
